Local Rink Loses in High School Curling Playoffs

The Carbon high-school rink entered in the Dominion high school curling playoffs went to Beiseker last Saturday to compete against Acme and Beiseker in the district playoffs. The local rink, skipped by Dick Garrett with Don McLeod third, Gordon McLeod second and Jim Foster lead, won its first game against Acme but lost the second to Beiseker. Beiseker also defeated Acme and will represent the district in the Southern Alberta playoffs in Calgary.

En route to Acme late Monday afternoon to take part in the bonspiel a Carbon rink composed of Bob Shaw, Chris Thumlert, Jack Barr and Dick Gimbel was forced to turn back at the McMann coulee because of drifts. The blizzard blowing at the time had filled in the road behind the party and they had to shovel a good part of the way back. The car was finally left on the road west of the Stan Gouldie farm and the men walked to the latter's place, where a phone call was put through to Carbon. Because of heavy drifts the curlers had to walk to the corner east of the farm, where they were met by the municipal light delivery and brought to Carbon.

The men were exposed to the full force of the blizzard for about 2½ hours and three of them were severely frosthitten. Bob Shaw suffered a frozen cheek, Jack Barr frozen cheeks and heels and Chris Thumlert a frozen nose and forehead. Dick Gimbel suffered no ill effects from the trip.

The Junior Athletic Club Amateur Night is scheduled for Friday evening, January 27th, and with a forecast for milder weather a big crowd is expected to be on hand for the occasion. An entry list of about 20 contestants is expected and a varied program is in store for those who attend. A draw for a door prize will also be made during the evening.

Carbon Lodge Officers Installed

At the January meeting of Carbon Masonic Lodge No 107, A.F. & A. M., G. R. A., the following officers were installed for 1950:

W. Bro. W. F. Ross	W.M.
W. Bro. John Atkinson	I.P.M.
Bro. Leon A. Coates	S.W.
Bro. R. J. Shaw	J.W.
Bro. R. A. Campbell	Treasurer
R.W. Bro. W. A. Braisher	Secretary
Bro. C. A. Warren	Chaplain
Bro. C. A. Cressman	S.D.
Bro. F. Emery	J.D.
Bro. L. F. Poxon	I.G.
Bro. T. J. King, Jr.	S.S.
Bro. Leo E. Brown	J.S.
R.W. Bro. Leonard Poxon	D of C
R.W. Bro. W. A. Braisher	Registrar
R.W. Bro. F. J. Bessant	Tyler

The annual meeting of the parishioners of Christ Church, Carbon, has been postponed and will be held in the church basement on Wednesday, February 1, at 8 p.m.

Oil In The West

MANY LEADING INDUSTRIALISTS and financial experts have expressed the view that the discovery of new sources of oil in the West is the most important economic development which has taken place in Canada during the past year. World supplies of oil, like those of many other natural products are becoming smaller, and established sources of production are gradually being exhausted. The search for new fields in Alberta, which proved so successful during the past few years, has now spread to Manitoba, Saskatchewan and British Columbia, and extensive surveys are being made in the hope of adding further to the supplies now being produced in the West.

Much Money Being Spent

A number of large oil companies have secured rights to look for possible new oil fields in Manitoba and Saskatchewan and it is believed that there is likelihood of extensive developments taking place there. Some 60,000,000 acres of land in Saskatchewan are being investigated, and large sums of money are being spent in the search for oil there and in Manitoba. These areas are now second in activity only to Texas, in the world-wide search for new oil fields. In the age in which we live oil is a highly important commodity. All forms of motorized equipment depend upon it for fuel and its uses for driving airplanes and for diesel engines and locomotives are extensive.

Oil Is In Great Demand

Oil supplies in the Far East have played an important part in political developments there, some of which have affected people far removed from that area. With oil in great demand in time of peace, and with even greater and more vital uses in the event of war, the importance of the discovery of new fields is evident. Recent developments in Alberta have led to great expansion there, which has affected the economy of the whole country. They have also proved to be an incentive to those who are now looking for new fields in the other provinces. The progress of this search will be watched with interest not only by those immediately concerned, but by many in all parts of the country who realize the importance of such developments in these times.

"The Nice Way to take Vitamins"

KEEP FIT WITH

ALLENBURY'S
Haliborange

A blend of Halibut Liver Oil and Concentrated Orange Juice with additional Vitamin D, Haliborange is the pleasant way for children and adults to ensure better health—greater resistance to colds and illness.

Get Haliborange from your Druggist today.

PROVED HE WAS A BOY OF HIS WORD

McMINNVILLE, Ore.—Bob Patty, 12, walked a mile through the snow in his bare feet to prove he was a boy of his word.

Some time back, Bob had remarked to his family that "If we get four inches of snow this year I'll walk barefooted to Ballston in it."

Recently they got four inches so Bob took off his shoes, left his rural home and walked the mile to Ballston, a small community six miles south of here.

Do You Suffer FROM A "Weak" Back?

Does sitting in a draft or in a damp, chilly room sometimes bring on an aching back? Many people say they get "cold" in the back—or in the kidneys—so easily. At such times it's good to know about the quick relief of Dr. Chase's Kidney-Liver Pills.

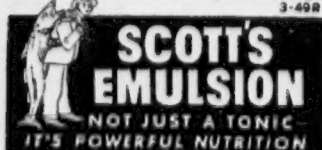

Remember, both kidneys and liver must filter out impurities from your bloodstream. So if you feel tired, worn-out, headachy—with painful joints and aching back—look to both your kidneys and liver. That's why Canadians have been relying on Dr. Chase's Kidney-Liver Pills for over half a century.

Give your system a chance to work properly. Always keep Dr. Chase's Kidney-Liver Pills handy—especially during damp chilly weather. The name "Dr. Chase" is your assurance.

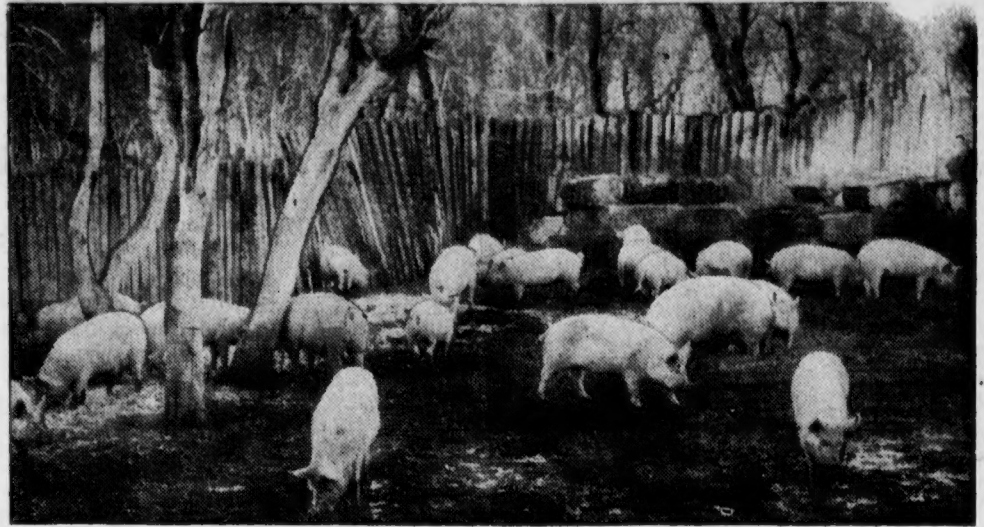

HUSKY BABY?

Help Keep Young Bodies Strong and Well

Mothers—to help your baby to have sound teeth, strong bones and a more husky body, give him pleasant-tasting, easy to digest Scott's Emulsion. Scott's Emulsion contains the Natural Vitamins A and D with other essential elements that babies and children may need for proper growth. That's why so many recommend Scott's. Buy the large economy size to-day!

First Pig Hatchery

The photo above shows some of the 75 sows at the first pig hatchery on this continent. The hatchery is in Morris, Man., forty miles south of Winnipeg.

Manitoba To Continue War On Weeds

WINNIPEG.—Between 3,500,000 and 4,000,000 acres of farm land in Manitoba will be sprayed in 1950 in the chemical war on weeds, it was forecast at a meeting held under the auspices of the provincial government's weeds commission at the legislative building.

Last year 2,300,000 acres in this province were sprayed with 2,4-D in the weed war.

In the three prairie provinces the total acreage sprayed was 8,200,000 acres. This year the total may run as high as 15,000,000 acres, H. E. Wood, chairman of the weeds commission said.

More than 50 delegates attended the meeting. Invitations were sent out to all those interested in chemical weed control.

The meeting had a twofold purpose. It was called to plan two future weed control meetings and to lay plans for extensive chemical weed research and experimentation, to be carried on in this province during the coming season.

A weed control meeting will be held at the University of Manitoba March 9, under the chairmanship of Prof. T. J. Olson of the plant science division. A second meeting will be held in mid-March at the Brandon school of agriculture under the chairmanship of D. A. Brown, assistant superintendent of the dominion experimental farm.

At these two meetings the findings of the two major weed conferences held in November and December will be reported to Manitoba farmers and others interested in the control of weeds by chemicals. The two conferences were the western weed conference at Edmonton and the north central weed control conference in Sioux Falls, S.D.

SHEEP ON THE INCREASE IN AUSTRALIA

CANBERRA.—Australia's statisticians almost went to sleep over this one. They counted the sheep in the Commonwealth and reported that last March 31 there were 108,728,000 sheep—an increase of 6,170,000 in 12 months.

Who escapes a duty avoids a gain.

I Was Nearly Crazy With Fiery Itch—

Until I discovered Dr. D. D. Dennis' amazingly fast relief—D. D. Prescription. World popular, this pure, cooling, liquid medication speeds peace and comfort from cruel itching caused by eczema, pimples, rashes, athlete's foot and other itch troubles. Trial bottle, 35¢. First application checks even the most intense itch or money back. Ask druggist for D. D. D. Prescription (ordinary or extra strength).

FUNNY

And

OTHERWISE

"Who was the blonde I saw you with on Thursday?"

"The brunette you saw me with on Tuesday!"

Hyde Park orator: "Having said all I am going to say, I will return to what I was coming to when I was interrupted and repeat what I was prevented from saying."

Client: "Didn't you make a mistake in going into law instead of the army?"

Lawyer: "Why?"

Client: "By the way you charge there would be little left of the enemy."

Two disgruntled farmers liked to grouse to each other.

"Never did see hay grow so short as mine this summer," sighed one.

"You think yours is short," answered the other. "I had to lather mine to mow it!"

A police officer was preparing to fingerprint an offender.

"Wash your hands," he ordered. "Both of them?"

The police officer hesitated for a moment.

"No," he said, grimly. "Just one of them. I want to see how you do it."

A big-time gambler had just died. The funeral was well attended by his professional friends. In eulogy, the speaker said, "Spike is not dead. He only sleeps." From the rear came a voice, "I've got \$100 that says he don't wake up."

THE TILLERS

—By Les Carroll

Saskatchewan Board Warns Car Drivers

REGINA.—On the first offence of drunken driving, in Saskatchewan, the Highway Traffic Board revokes the driver's licence for six months. D. Drummond, acting chairman of the board, has reminded motorists. At the termination of the suspension period, a red licence is issued.

A driver's licence is revoked indefinitely after a second conviction for driving while intoxicated, he added.

Somewhat less drastic curtailment of driving privileges results from reckless driving. On the first offence, the licence is revoked for three months; on the second, for six months; and on the third, indefinitely. Similarly, a red licence is issued at the end of the suspension period.

WILL USE MILK BOTTLES TO BUILD GLASS HOUSE

TAMPA, Fla.—For six years now, G. B. Massaro has been collecting milk bottles and piling them in front of his house.

His wife thinks it's silly, but Massaro has ideas.

He plans to build a glass house when he gets 6,000 bottles. He already has 4,000, from every state in the United States and one from Argentina.

Windsors Plan Visit To Ranch

NEW YORK.—The Duke and Duchess of Windsor still plan to visit the duke's Alberta ranch some time this spring, the duke's secretary said recently.

But she added that "the plans have not crystallized yet and it is not possible to say just when they will go there."

The 4,000-acre ranch near Pekisko in the High River district about 65 miles south of Calgary, was purchased by the duke, then Prince of Wales, some 30 years ago. He has not visited it since 1941.

The Duke's secretary, while emphasizing that no detailed plans have yet been made for the visit, said the duke and duchess "do definitely plan to go there."

CITIZENS OF OGEMA TO GO FOUR BETTER

OGEMA, Sask.—The provincial government has approved construction of a four-bed nursing home here, but residents of Ogema aren't stopping there. With volunteer labor and money contributed from various local organizations, the community is building an eight-bed hospital.

Simply great to relieve 'PERIODIC'

FEMALE PAINS

with uncomfortable fullness

Are you troubled by distress of female functional monthly disturbances? Does this make you suffer from pain, feel so nervous, restless, cranky, weak—at such times? Then do try famous Lydia E. Pinkham's Vegetable Compound to relieve such symptoms!

Pinkham's Compound has proved remarkably helpful to women troubled this way. You owe it to yourself to try it.

Pinkham's Compound is a very effective uterine sedative. It has a grand soothing effect on one of woman's most important organs.

Lydia E. Pinkham's VEGETABLE COMPOUND

Taken regularly—Pinkham's Compound helps build up resistance against such distress. Also a great stomachic tonic!

NOTE: Or you may prefer Lydia E. Pinkham's TABLETS with added iron.

First Test Of Arthritis Cure Successful

TORONTO. — Gordon Wyatt, 29-year-old Canadian army veteran from Sudbury, Ont., grinned broadly when he stepped from his wheelchair in Sunnybrook Hospital to demonstrate for reporters what treatment with ACTH has done for his arthritis.

Wyatt's case is the first reported test in Canada on arthritis with the rare drug, unreleased yet for general use. Hospital officials emphasized the drug was used only as an experiment.

The experiment was a "top secret" venture in Sunnybrook after Wyatt agreed to it early in December.

Doctors "swore me to secrecy", he said. "They gave me strict orders not to tell anyone I was getting ACTH. I didn't even tell my sweetheart, although she does know I am undergoing a special type of treatment."

If the treatment cures him, the tall, gaunt veteran who was born in New Liskeard, Ont., plans to get married.

Wyatt first suffered from rheumatoid arthritis and another allied disease, reiters, while serving overseas in 1943 and was returned to Canada. Since then he has been in and out of veterans' hospitals.

About the middle of December doctors started giving him injections of the new drug every six hours for 14 days. The injections then were discontinued.

After two or three days, Wyatt reported the pain had "pretty well" left him and he experienced a feeling of well-being. He was able to get up without assistance and walk about, something he had not been able to do without great pain for a long time.

"It now is approximately two weeks since the injections were stopped and I still feel pretty well," said Wyatt.

Hospital authorities hastened to add: "This is definitely not a treatment—just an experiment. The drug is not released for general use; it is very difficult to get, and if the public got the idea it was a treatment we would be getting calls from all over Canada."

Wallpaper, we read, is ideal for wrapping packages. But how do you get the darn stuff off the wall?

SHORTEST DISTANCE

The shortest distance across the United States is 2,152 miles, from points near Charleston, S.C., and San Diego, Cal.

TORONTO'S SUNDAY SPORT VOTE—Only three Toronto wards voted against Sunday sports, despite energetic campaigns waged. Three scattered wards are marked in black. Ward 5 gave largest majority for sports, 14,232 to 7,723. Ward 9 gave largest against, 15,086-8,988. However, a year's delay may result before enabling legislation by the provincial government can be brought down to legalize Sunday sport in Toronto and Windsor, it was learned in Ontario government cabinet circles. Some doubt was expressed that the government would have time to make up its mind on "the highly controversial subject," and decide on proper legislation in time for the approaching legislative session this February.—S.N.S. photo.

(By Francis James)

Since the recent, startling discovery that children are people too, it has been assumed that they are affected by the type of environment in which they find themselves. This includes bedrooms, nurseries and playrooms. Consequently, Junior is no longer being stowed away in the small room at the end of the hall—you know the one the trunks were taken out of when he got too big for the crib in Mummy's room. The small room at the end of the hall he may still have—but it's being fixed up first so that it will be in tune with his age and character.

A child's room should first of all be cheerful. Bright, light-giving colours will do much to supply this characteristic. For the very young child, of course, the pastel tints are best—giving the feeling of cleanliness and daintiness that is needed in a room that belongs to someone who is very young.

Pinks and blues for the walls and draperies are good with furnishings in off-white, cream or ivory. Floor covering is important—especially for the creeper—where warmth must be taken into consideration. Fine linoleum over felt is practical for a room of this type—and when carefully selected as to colour and pattern it can be most attractive too.

For the older child this delicacy can be replaced by gaiety. Bright wallpaper—plaids, checks, dots, or some colourful pattern, will do much to give the room the atmosphere it needs. Draperies can be patterned

or plain, with a bright fringe to blend with the background colour of the wallpaper.

Scatter rugs add a note of gay informality in a room of this type. From a practical standpoint, it is probably well to avoid rugs of a solid colour. These spot so easily—and young children are such great little spotters.

A gaily patterned bedspread—or one that is smartly tailored in a rough fabric, a bright transfer at the foot of the bed, a ruffled chair for a girl, a happily painted one for a boy—all are small touches that create a happy atmosphere for our children. And a happy atmosphere is something that has become important since the sudden, startling discovery that children are people, too.

PHOTOGRAPH ENSURED DELIVERY OF LETTER

TORONTO. — All that showed on the envelope was a newspaper clipping of a man's photograph and "Main Street, Weston, Ont."—but George Pollard, 82, received the letter it contained from a friend he hadn't seen for 30 years.

The friend, Richard Whittaker, of Carleton, Que., left Weston in 1919 and lost Pollard's address. He saw Pollard's picture in a Toronto newspaper recently and used it to renew their friendship.

Silk culture was first introduced into this country about 1737.

HEALTH

Importance Of Ward Staffs In Mental Hospitals Stressed

Ward staffs in mental hospitals, whether graduate nurses, psychiatric aides, or attendants, are the hands and eyes of the medical staff, and the present trend toward better training of such personnel is praiseworthy, says Dr. J. D. M. Griffin, medical director of the National Committee for Mental Hygiene, Toronto. Importance of having ward staffs of high calibre is emphasized by the continuing shortage of medical specialists in psychiatry, according to Doctor Griffin.

Affiliate courses in mental services are open to nurses-in-training in some parts of Canada, but graduate nurses working in mental hospitals largely learn their special skills on the spot while caring for patients suffering also from physical conditions or receiving medication.

Training courses which enable ward staffs to have an important part in the treatment program have been offered attendants for some time and are constantly being revised and improved. An instance, according to Doctor Griffin, is the three-year training course totalling 500 hours which was initiated in Saskatchewan several years ago. Several hundred students were enrolled at union wages.

Ward staffs are closer to patients than any other individuals, and when well chosen for their capability, sympathy, and interest, followed by careful training, they can be tremendously effective as the hands and eyes of small medical staffs. Dr. Griffin's development of good staffs will increase the number of patients who can return to their homes and communities. At present about 80 per cent. of the patients admitted to Canadian mental hospitals recover or go home much improved.

Rapid turnover of ward staffs in some parts of the North American continent may be ascribed to insufficient care in selection, poor orientation to program, working and living conditions for personnel, plus wage levels and security. Dr. Griffin also states that weaknesses in training program also affect staff stability.

PUSSY-CAT GOES OUT FOR FREE-WHEELING SPIN

LONDON.—A little kitten with a whopping dizzy spell wound up in Peggy Bloom's cat clinic.

A truck driver who helped the woozy kitten stagger in said she had done 5,000 loops through the streets of London.

She had whirled an estimated 12 miles—wedged between the double wheels of the driver's truck.

It took about an hour to "unwind" her.

Prejudice is the reason of fools.

On The Side

—By—
E. V. Durling

STYLISTS

Why is it men dominate the dress-designing field? Why are the clothes of the male stylists so much more popular than those of female design? It is claimed men have a bolder sense of color. That they also have a better sense of proportion. But the chief reason the men designers excel the females is said to be because a woman designer can never get away from herself. She designs clothes that look well on her but are unsuitable for women of a different type and figure. The male designer views the style situation impartially. He tries to originate designs for all types and figures. The same angles are said to apply to hat designing.

DRUNK DRIVERS

Many auto accidents are caused by the fact the drivers involved don't know they are loaded. I mean, said drivers are drunk and don't know it. After a man has consumed about six highballs he may think he is in a perfectly normal condition, but the fact is he has become a little more reckless. He drives faster and takes more chances than usual. No man who has to drive a car afterwards should drink more than three highballs. No woman driver should drink more than two.

SO THEY SAY

Wives born under Aries (March 21-April 20) are usually psychic. They are mind readers and are the most difficult to deceive of all matrimonial mates. Aquarius (Jan. 20-Feb. 20) women love the spotlight. They enjoy being conspicuous. If you see a woman at the theatre or in a night club wearing a strapless red evening gown and smoking a cigarette in a long holder she is probably an aquarian... Libra (Sept. 23-Oct. 22) men find beauty of face and figure more appealing in women than intelligence that's why so many Libra executives have such shapely "oomph" girl secretaries, or so say the stargazers.

DUCK EGGS

Ever consume a duck egg? Neither have I. Some people claim ham and eggs, using duck eggs, is a tasty dish. Not only that, they claim consuming these eggs can produce vim, vigor, vitality, etc. One woman, who admits to 60 years of age, says she has been on a duck egg diet for many years and is still in possession of all her own teeth. Also that her hair is still black and she is usually taken to be 20 years younger than she is.

MULISH MEN

A man who reaches the age of 55 in good health has a good chance of living 20 or 30 years longer. So say the longevity experts. Right now there is considerable discussion regarding the unusual number of business executives who pass on before their 55th year or reach that age in bad physical shape. It is said this sad state of affairs is due to the fact that many business men are so tense and taut at all times that they do not know how to relax; they eat too much and are excessive consumers of strong drink. Also many business men make the mistake of eating dinner while they are still fatigued from their day's work. If you have an executive in your home the thing to do is to subject him to firm supervision. I can just hear many matrons among our subscribers commenting on this latter suggestion as follows: "Says you!" Meaning, of course, that it is much easier said than done. It is the general opinion among wives that one husband is harder to handle than four small children.

Pattern 4894 comes in sizes 2, 4, 6, 8, 10. Size 6 jumper takes 2 yds. 39-inch fabric; blouse, 7/8 yd. This pattern, easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send twenty-five cents (25c) in coins (stamps cannot be accepted) for this pattern. Write plainly size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept.,
Winnipeg Newspaper Union,
60 Front Street W., Toronto.

Weekly Tip

BANISH THE STAIN

Baking soda will rout stains from enameled cooking utensils. To banish the stain, sprinkle soda on a damp dishcloth and rub the spot until it disappears.

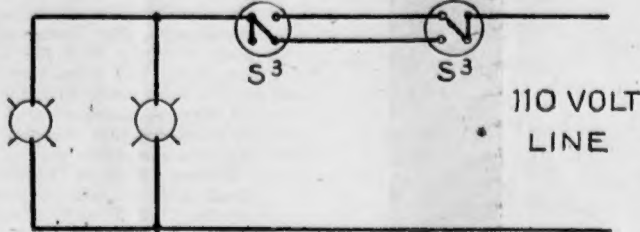

There are more than 900 languages used in Asia, and more than 1,600 languages and dialects are used in the Americas.

House-Barn Light Circuit

PLEASE give me information on a 3-way switch to operate a light between the barn and house. I also want to wire barn on this same circuit.—A. D., N.E.

Ans.—We are showing herewith a diagram of the wiring for a lighting circuit which can be turned on or off from two points. For this you will need two three-way switches, one located at the house and the other at the barn. This will require two wires between house and barn connecting the two switches. Then, from the

output side of one of the switches a wire must be run to the light while another wire will be needed from the other side of the light to the source of current. For lighting your barn you will need a separate intake from your distribution point with a main switch of the proper capacity for the load to be handled and a distribution panel for the lights in the barn. Unless you have had experience in the wiring of buildings it would be much better for you to have this done by a qualified electrician.

This wiring arrangement will control lights with 3-way switches at the two points S3.

Editor's Daughter Proves A Great Boon To Paper

MISSOULA, Mont.—Things didn't look so good for the Missoula Times' Christmas edition. C. J. Doherty, publisher, was stricken and hospitalized by a heart attack last August. He wasn't going to be able to do his usual selling job along Missoula's busy business streets.

But Doherty hadn't played his ace. When he did, well, look at the results. The Times went to press with more than 1,000 inches of greeting advertisements!

The reason for the success is Doherty's daughter, Cathy (that's short for Catherine). She sold the 1,000 inches of Christmas greetings in 40 hours after-school work.

Actually, ad selling was not new

KITCHEN MEDITATIONS

A VISITOR

By JANE DALE

A trim young sparrow flew to my door. He looked in saucily. I said, "How do you do? Won't you come in?" I'm sure he nodded to me!

That trim young sparrow paused on my step. Others around him flew. Then he flicked his tail and gave a chirp—"I'm off. Good day to you!"

to Miss Doherty. When her father was critically ill in a hospital last August, she took over the Times. The result was the biggest advertising month of the year.

PRISCILLA'S POP—No Waste Motion

After Extensive Tests Saunders Wheat Satisfactory And Popular

SAUNDERS wheat has been tested extensively in experimental plots since 1945 and has been grown by the farming public of northern Alberta and British Columbia during 1948 and 1949. Its performance during these years has been most satisfactory and it is increasing rapidly in popularity, says A. A. Guitard, Dominion Experimental Station, Beaverlodge, Alberta.

On the basis of 50 tests conducted sample displays better colour than Thatcher and during 1948 when an early fall frost was encountered tended to grade higher. These characteristics combined with the satisfactory milling and baking quality and disease resistance of Saunders make its development an important contribution to Peace River agriculture.

During the springs of 1948 and 1949 the Dominion Experimental Station at Beaverlodge supplied some 810 growers in the Peace River region with Certified seed of Saunders wheat. It is now felt that there is sufficient seed in the hands of growers to satisfy the demand and no further distribution of Certified seed will be undertaken by the Station. It is expected that a small quantity of Foundation Stock may be available for the 1951 season. This will be distributed to well-qualified prospective Elite growers as basic stock for the production of first-generation Registered seed. Therefore, assuming normal increase, a small quantity of Registered seed should be made available by Elite growers for the 1953 season.

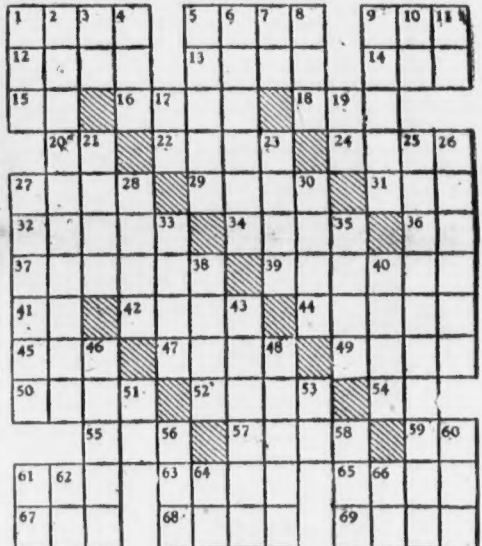

Growers are generally agreed that Saunders is more easily threshed than Thatcher, yet holds its kernel sufficiently well for combining. The

Export of Alberta natural gas will not take place until a 50-year reserve has been definitely established, according to N. S. Tanner, Alberta's Minister of Lands and Mines.

VENICE: QUEEN OF THE ADRIATIC

Boat Ride At Birth And Death Inescapable

Gondolas moored to sidewalk, with the Rialto bridge, the Times Square of Venice, in the background. —Central Press Canadian.

By SANFORD MARKEY
(Central Press Canadian
Correspondent)

Life's inescapable "death and taxes" takes on a third point in Venice—a boat ride.

Built on 117 islands, Venice's history, past and present, revolves around canals, boats and trade. The tourist who arrives by train finds that his first trip in the city is a boat ride to his hotel.

Venetians will tell you one factor is inescapable: a boat ride at birth and at death. The city's hospital is accessible only through a ride by boat. Entrance to the hospital's maternity ward is alongside a canal.

At the rear of the hospital is another doorway leading to a canal. From this door the dead are removed via a black gondola either to a church, a home, or the burial ground on the Island of San Michele just outside the city.

Buildings along the canals were constructed on wooden piles driven deep into the mud and rock under the water. As the piles began rot-

ting where exposed to the air and action of waves, Venetians began to encase them in cement.

Even so, many buildings have listed to one side so that there is the impression that they support themselves by leaning against each other.

Venice is one of the few Italian cities to escape war's damages. No bomb fell on the city, and there was little if any shooting.

Once the city was among Europe's greatest in commerce and politics. Its rulers, or doges, sent their ships into the eastern Mediterranean waters to bring back the leather goods, laces, silks and spices from Asia. Not until the around-Africa route to Asia was discovered did Venice begin to decline. With the discovery Venice's monopoly of Oriental trade passed to the Portuguese, the Dutch and the English. Yet Venice remained a power until Napoleon conquered the city-state.

Today, Venice lives by its tourists, who thrive on the city's historical link with the past.

Because Venice dealt so much with the East, the city's architecture reflects both the Byzantine and Renaissance periods.

You see traces in the Cathedral of San Mark and the Clock Tower, just two of the dazzling exhibits of glory that is the main square, the Piazza San Marco. Then, there are the masterpieces of such artistic greats as Titian, Carpaccio and the Bellinis.

Although the hustle and bustle of modern days has come to the city's 150,000 dwellers, Venetian artisans still maintain the link that made them the toast of the continent during the Middle Ages.

In the workshops of the Island of Murano, the descendants of the great glass makers still blow their products with the pride that existed in the heyday of Venice.

Even now, the Muranese refuse to allow anyone but a native of the island to work with them; today's counterpart of the past when the Doges ruled that emigration by glassmakers was prohibited on penalty of death.

As for lacemakers, the Island of Burano still holds top position with the Buranese masters of the art.

Even in the city's gondollers, there is the link with yesteryear. The arrival of the outboard motor has speeded transportation and given commercial ventures a necessary lift, but it is the gondoller, the taxi driver of Venice, who can show the tourist the spot where the incredible Cas-

anova reportedly escaped from prison near the Bridge of Sighs.

He can point out, too, all the old mansions of the great merchants who lived along the Grande Canal, and he knows the stories, the gossip and the flavored tales that can be spun between the lines of the guidebooks. Finally, for an added fee, he will sing you the songs of the gondollers.

It all goes with the tourist brochure of the glory and loveliness of Venice, an ageless city, wealthy in its link with the past, romantic in its touch with the future.

GEMS OF THOUGHT

EDUCATION

To know the laws of God in nature and revelation, and then to fashion the affections and will into harmony with those laws—this is education. —S. F. Scovel.

The first consideration a wise man fixeth upon is the great end of his creation; what it is, and wherein it consists; the next is of the most proper means to that end.—Walker.

A heap of ill-chosen erudition is but the luggage of antiquity.—Balzac.

The aim of education should be to convert the mind into a living fountain, and not a reservoir. That which is filled by merely pumping in, will be emptied by pumping out.—John M. Mason.

True wisdom is to know what is best worth knowing, and to do what is best worth doing.—Humphrey.

Sooner or later we shall learn that the fetters of man's finite capacity are forged by the illusion that he lives in body instead of in Soul, in matter instead of in Spirit.—Mary Baker Eddy.

JOHN, SUSAN FAVORITE NAMES FOR BRITISH BABIES

LONDON. — The plainer, shorter and more old-fashioned the name, the more fashionable it is for British babies this year.

Birth notices show John is the favorite boy's name and Susan tops the girl's list.

The child's name is not shortened these days as it used to be. It is always Henry, Richard or Edward—not Harry, Dick or Eddie.

Something better is quality's only rival.

Tunney Picks Jack Dempsey As Kingpin Of All Boxers

THE greatest heavyweight of all time was Jack Dempsey, says Gene Tunney, one of the few boxers who retired undefeated from the heavyweight throne—and who licked Dempsey twice. Writing in Collier's, the polished boxer who used to commune with Shakespeare in training camps, went far out on a limb, analyzed every heavyweight "great" during the last century—except himself—and tabbed the Manassa Mauler as the kingpin of them all.

"By the process of elimination of all other heavyweight champions except Jack Dempsey and Joe Louis, and comparing the more numerous and serious weaknesses in Louis' career as against Dempsey's, I feel justified in stating that Dempsey was the greatest heavyweight of all time," Tunney writes in Collier's.

"I don't want it thought that I have anything but the highest regard for Louis. He reigned longer than any other heavyweight champion and remained at his peak longer than any other champion. The answer to whether or not Louis was the greatest ever gets down to what one

thinks about Dempsey. For if Dempsey was not, surely Joe Louis was." Here are Tunney's analyses of the heavyweights:

Dempsey—"In addition to hitting fast and with deadly effect, Dempsey was very fast on his feet . . . He could take advantage of an opening more readily than any heavyweight I have ever seen perform . . . when Dempsey was hurt, his efforts seemed to increase and he became that much more dangerous . . . he possessed a fine instinct for prize fighting, his instinctive reactions somehow made good strategy . . ."

Louis—"His fights after he won the championship from Braddock were mostly with second-, third-, and even fourth-raters . . . Louis was great enough to ward them all off . . . but who knows what would have happened had a real contender faced him? . . . Louis recuperated quickly and maintained his deadly punch with his right to the very end . . . While Louis had been blessed with a powerful right hand, Dempsey had one too, and was almost equally blessed with a left hook . . ."

"Black-Jack" Johnson—"His contest with Stanley Ketchel, a middleweight whom he took 12 rounds to defeat, was an indication of his lack of effectiveness . . . his showing against Jim Jeffries, when he won final claim to the heavyweight championship of the world on July 4, 1910, was not of championship quality . . ."

Jim Jeffries—"I cannot conceive of Jim Jeffries, even in his prime, finishing a 15-round fight with either Louis or Dempsey . . . he was too easily hit . . ."

Jim Corbett—"Fleet-footed, brainy and quick in his reflexes . . . introduced class to the prize ring . . . I sincerely believe that he might have defeated Joe Louis in a 15-round bout if they could have met at their peaks . . ."

Jack Sharkey—"A man of considerable potential, but because of his emotional make-up, crises within the ring muddled his thinking . . ."

Max Schmeling—"Had a beautiful straight right-hand punch . . . but he lacked the quality of greatness . . . he never seemed to sense the dramatic moment to step in and win, as was demonstrated in his fights with Max Baer and Jack Sharkey . . ."

Max Baer—"Victim of his own adolescent desires—too much nightclubbing and clowning, and not enough serious training . . ."

Jim Braddock—"His inclusion among the heavyweight titleholders was the sheerest bit of luck . . . wore the heavyweight crown shakily for two years without defending it, until Joe Louis knocked it off his head once and for all . . ."

Primo Carnera—"Biggest man ever to fight under modern rules, he won an impressive number of frivolities because of the mediocrity of his opponents, mostly setups . . ."

As for Dempsey and Louis hooking up in their primes, Tunney writes: "I am of the belief that Dempsey would have caught Louis with a left hook early in the fight and started him on the road from which he could never recover, despite his great powers of recuperation. Dempsey was a tiger as a finisher. As a hitter Louis was a killer; but I think Dempsey would have beaten him to it."

N.H.L. Sport Notes

120 Games Without A Penalty

Boston Bruins' steady defender, Bill Quackenbush, had played 120 consecutive N.H.L. games on December 30 without incurring a single penalty. The last time the Lady Byng Trophy winner received a penalty was on March 6, 1948, against Montreal Canadiens, when he was given two-minutes for high-sticking.

21 Shutouts In First 98 Games

The six National League goaltenders have been playing phenomenally well this season. After the first 98 games of the 1949-50 season have been recorded, figures reveal that there were no less than 21 shutouts. Bill Durnan, Canadiens and Turk Broda, Toronto head the shutout parade with five apiece. Husky Harry Lumley of Detroit is next with four "collars" to his credit, and is followed by Chuck Rayner of New York Rangers with three, and Frank Brimsek, Chicago and Jack Gelineau, Boston, with two each.

Toronto Are "Fightingest" Club

Toronto Maple Leafs appear to be the fightingest club in the N.H.L. At any rate the Leafs had more major penalties than any other club at the end of the first 98 games of the current season. The Toronto crew received 11 majors, Detroit had seven, Boston and Canadiens, six; Chicago, five and Rangers, two. The Leafs always have been partial to the five-minute penalties. Last year they led all other teams with 20 majors during the 60-game schedule. Rangers received the least with three.

Four Of Six Goalies Have Penalties

Four of the six N.H.L. twine-tenders have been penalized this season, and two of them, Harry Lumley of Detroit and Chuck Rayner of New York Rangers were penalized twice. Others to be credited with two-minutes in the sin-bin, although another player actually served the time, were Bill Durnan of Canadiens and Frank Brimsek of Chicago. Jack Gelineau, rookie Boston net custodian and Turk Broda, veteran Toronto cage janitor, are the two goalies who have not received a penalty this season.

Helpful Hints

When your fur coat gets wet, hang it up to dry, but away from the heat. When it is dry, brush the fur with a soft clothes brush.

If you scour your waffle iron, better re-season before you use it again. Rub with unsalted fat, close the iron and turn on at lowest heat for about eight minutes. Wipe off excess fat with paper towelling.

If ink is accidentally spilled on a polished or bare wood surface, make a mixture of powdered pumice stone and linseed oil. Be sure to have the mixture light and creamy. Apply with a heavy-bodied cloth or a piece of felt.

If your radio is the type with an open back dust will accumulate quickly in this unprotected space. Save yourself future service bills and tack or glue a covering of muslin or cretonne over this open space and keep the dust from coming in.

Garments of rayon fabrics do not need moth-proofing before being put away for winter. Moths are not attracted to rayons. See that the garments are cleaned before storing, however, as many types of stains become more stubborn with time.

Quick Embroidery

Alice Brooks

Busy little birds to embroider on kitchen towels. It's fun working with gay colors that brighten a kitchen.

An easy beginner's item! A child can do these! Pattern 7017; transfer 6 motifs about 7 x 7 inches.

Our improved pattern—visual with easy-to-see charts and photos, and complete directions—makes needlework easy.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Household Arts Department,
Winnipeg Newspaper Union,
60 Front Street W., Toronto.
Be sure to write plainly your Name, Address and Pattern Number.

Smile of the Week--

Two little girls on their way home from Sunday school were solemnly discussing the lesson.

"Do you believe there is a Devil?" asked one, just a bit frightened.

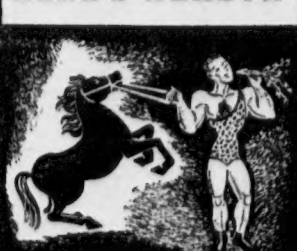

"No," replied the other soothingly.

"It's like Santa Claus; it's your father."

WARNED OF DANGER — Death for children is packed in grenades such as these, if youngsters find them and handle them carelessly. Child was killed and another half blinded by bomb found in Ontario.—S.N.S. photo.

OUR COMPLETE SHORT STORY—

Nocturne On Ice

Chett Knew What Three Words "I Love You" Meant On Ice.

By ANNA E. WILSON

MYRA knew she could do it but, as she came down into the hollow, she held her breath. She had no business there, especially by moonlight. The hollow was Chett's. Below her the ice had formed a natural rink reflecting the pines and the snow. The air was so still that when she let out her breath it made a small whisper. She moved and, suddenly, the night was alive with the sound of steel striking on ice, to the flash of silver blades twirling with such speed that you scarcely noticed the grim line of Myra's chin. This must be perfect, this gift to Chett, this pattern on the ice that would stay here after she had gone away. Her face softened into the smile of the thrill of the ecstasy of the moment.

None but a champion could have done it and no one would know what it meant—no one but Chett.

She'd met Chett when she was training for a local figure skating championship; they'd been picked for the same team by Cliff Nadin. She'd been standing on the edge of the ice, tense, waiting for her turn as she took final instructions. A whistle had blown somewhere and Cliff had said, "Watch this" and this had been chett swinging into a burst of speed that left him standing by Cliff's side before she had time to see that he was tall and slim. She'd hardly heard Cliff's "Good work, Chett," or his casual, "You two should know each other" because she and Chett were busy looking into each other's eyes.

After that it had been pure magic. She couldn't have told just when things began to change. Perhaps it was when, their training finished, they had begun to work up through the ranks to national rating as champs. At first it had been only a feeling of tiredness, a feeling that she couldn't keep up with the happy, carefree life that clustered about Chett. The tiredness had grown until a day's gruelling practise sent her

to bed and finally became a soothing blanket from which she knew no escape.

More and more she had become a lonely figure on the outskirts of Chett's crowd—watching Chett.

She wasn't sure either when she first knew that she had begun to slow down, that there was a slight blurring of the perfection of her curves and patterns on the ice. It made it worse that, while her skill was leaving her, Chett's brilliance was greater than ever.

If she could have told Chett the truth, it might have helped but she felt that she could not blunt the keen edge of his triumph and so she went on with a routine that was gradually wearing her down until Cliff called her in. He was bluntly kind.

"I'm dropping you from the team, Myra, for your own good. For a long time now, you've been going on your nerves. A few more performances like the last one and you'll blow up. Take a long rest. After a while you'll be able to come back—for short engagements—but you haven't the stamina for championship stuff. Chett thrives on it. We'll be signing him up for another season. Chett's at his height."

It hurt when he mentioned Chett. "Please don't tell Chett—not yet."

Chett had a skating engagement that would keep him until midnight so she had plenty of time to leave. Nothing was left to pack now but her costume, the one Chett liked.

But she couldn't go without leaving something for Chett; something to carry with him into the months ahead. It was then she had thought of Chett's hollow.

Now her gift to Chett had been given and it was only an arm about her that kept her standing there a bit dizzily on her feet beneath the pines.

"Myra!"

It couldn't be anyone but Chett. "Cliff had to cancel the midnight show on account of the ice. I came back early, found you all packed to leave and went to hunt up Cliff. I found your cancelled contract on his desk."

They stood there looking down on the ice. She could hear the sharp intake of his breath as he studied the pattern and her heart beat fast as she caught the hoarseness in his voice. "Did you think, Myra, that for the sake of a season's skating, I'd go away and leave my wife?"

For the first time, she felt happy and secure. They turned back towards Chett's house, leaving the hollow deserted in the moonlight, leaving her gift to Chett beautifully inscribed there like a fine old copper engraving. Only a champion could have written it thus, only Chett could have known what the three words, "I Love You," meant when he found them on ice.

SELECTED

RECIPES

JIFFY ROLLS

Two cakes compressed yeast, or 2 envelopes fast dry granular yeast, $\frac{1}{2}$ cup lukewarm water, 1 tsp. sugar, $\frac{1}{2}$ cup scalded milk, $\frac{1}{2}$ cup molasses, $1\frac{1}{2}$ tsp. salt, 1 egg (slightly beaten), 3 cups whole wheat flour. Soak yeast in lukewarm water and add sugar. Combine scalded milk, shortening, molasses and salt. Add egg to soaked yeast and blend well with first mixture. Add flour and mix well. Roll out on well-floured board and fit into greased pan 10" x 10". Cut dough with floured knife into strips $1\frac{1}{4}$ " wide, then lengthwise down the centre of pan. Brush cut surfaces with melted fat. Let rise in a warm place until double in bulk ($1\frac{1}{2}$ -2 hours). Bake in hot oven 425 F. for 20 minutes. Yield: 1 dozen large rolls.

PEGGY

Baby Beef Show

Prize winners at Shaunavon Baby Beef Show in Sask., were this brother-sister team of Shirley and Sherwin Mackay. Sherwin won the silver cup and gold medal of the show with his heifer.

Western Briefs

Law's Long Arm

WEYBURN, Sask.—The R.C.M.P. radio transmitter here is outdoing itself. With a normal range of 75 miles, operators recently talked with Montreal, Sherbrooke, Sutton and Rock Island, all in Quebec.

May Open Milk Plant

SASKATOON.—J. A. MacAulay of Winnipeg, vice-president of Canadian Safeways, suggested here that his firm might set up a milk-producing plant because of the "discrimination against the selling of milk in stores."

Vet. Relief

VICTORIA.—Word has been received in Victoria that the British ministry of pensions is willing to provide temporary relief to Imperial war pensioners in Canada who are experiencing definite hardship as a result of last year's devaluation of the British pound.

Hockey President To Retire

MOOSE JAW, Sask.—George Vogan, president of Moose Jaw Canucks of the Western Canada Junior Hockey league, announced he is retiring at the end of this season. "I've been running things long enough," Vogan said. "It's time someone else stepped in."

One-Day Bonspiels

CARMAN, Man.—Following the success of the several one-day bonspiels held last winter, it was unanimously agreed to hold similar events regularly before spring, the bonspiel committee being F. Muirhead, Harold Garnett and Stewart Young.

Pig Raising Profitable

SASKATOON.—Few lines of agricultural production had yielded better returns over a long period of years than pig raising, H. E. Wilson of the federal experimental station at Melfort told the Agricultural College Graduates' association here.

Population Climbs

WINNIPEG.—Another milestone in the history of St. Boniface was reached during 1949 when the population of the cathedral city reached 25,200, according to J. B. O. Leclerc, assessment commissioner. St. Boniface is the second largest city in Manitoba. In 1922 the population was 13,813, in 1930 it was 16,321 and in 1944 it was 20,241.

MEET MR. 5/8

PEARSON, Ga.—5/8 is just another guy named Smith. His family gave 5/8 that name 38 years ago to keep him from being confused with any other Smith.

It has worked so far:

In any case, 5/8 is well known in his home town. He is city councillor, jeweler and manufacturer.

5/8's name got in the news recently when a reporter wondered what his wife called him.

She calls him "Willy".

The canning and bottling of tomato juice increased tomato consumption four to five times.

Bowmanville Weekly Wins Editorial Trophy

VANCOUVER.—The Canadian Statesman, Bowmanville, Ont. has been awarded the Canadian Weekly Editorial Trophy as winner of a Dominion-wide editorial competition.

The competition, sponsored by the Canadian Weekly Editor, trade journal published here, is open to Canadian weekly newspapers.

Second place went to the Richmond Hill, Ont., Liberal, and third to the Powell River, B.C., News.

The subject of the winning editorial was the role of municipal government in Canadian affairs.

It is the second victory for the Canadian Statesman. It won the award in 1947 and placed second in 1948.

Vancouver Dog "Best In Canada"

TORONTO.—International champion Kenmare Masterpiece, a 5-year-old Kerry blue terrier owned by Mrs. Irene McEachern of Caulfield, West Vancouver, has been named the best dog in Canada.

The Canadian Kennel Club awarded him the James D. Strachan memorial medal as the outstanding dog of 1949.

British Columbia Rejects Alberta's Road Bid

VICTORIA.—Works Minister Carson has ruled out the Yellowhead Pass route in B.C.'s choice for the Trans-Canada highway.

A four-man delegation from Edmonton met the minister to press for acceptance of the route which would pass through their city, but found no support from the B.C. government.

The delegation, headed by Mayor Sidney Parsons, expressed a view that B.C. and Alberta sections of the highway and any gas pipelines to the coast should be built side by side along the Yellowhead route.

The four men urged Mr. Carson to support their plea for a fact-finding commission to study all routes and recommend the most acceptable.

Mr. Carson said such a commission would take two years to complete and delay start of construction. It is known that Mr. Carson favors the Big Bend route for the Trans-Canada highway.

Britain's 500-mile-an-hour jet airliner, the Comet, is to be fitted with a new-type landing gear to allow landings on runways not designed to support its weight.

Dale Poxon spent the weekend
at his home in Carbon.

Morris Switzer and John Buch-
ner were Drumheller visitors on
Saturday where the latter had the
cast on his broken leg replaced
by a lighter one. It will be sev-
eral weeks before Mr. Buchner
will be able to get about.

The annual Congregational
Meeting of Carbon United Church
will be held Sunday evening, Jan-
uary 29, after church. The church
service that day will be held at
7.30 p.m. instead of the usual
hour. All members and adherents
of the church are urged to attend

LITTLE NEWS ITEMS OF LOCAL INTEREST

Cold weather forced cancella-
tion of the January meeting of
the Canadian Legion and officers
will now be installed at the next
meeting. Legion members and all
other veterans are urged to at-
tend this meeting.

Arnold Martin of Nacmine vis-
ited in Carbon over the weekend
at the home of his parents, Mr.
and Mrs. Ed Martin.

Rev. Jacob G. Rott will conduct
morning services at the Carbon
Baptist Church and evening ser-
vices at Zion Baptist Church on
Sunday, January 29th.

Born to Mr. and Mrs. Vic Luft
in the three Hills hospital on Mon-
day, January 23, a son.

Bill Ross is attending the Build-
ers' Hardware convention being
held in Calgary this week.

The Annual Convention

OF THE

Alberta Liberal Association

WILL BE HELD IN THE

Palliser Hotel, Calgary, Alberta

February 1 & 2, 1950

Each Provincial Constituency is entitled to ten delegates.
See that your constituency is fully represented.

Alberta Liberal Association

How can I save money?

That's what I asked the Government Annuity
representative.

I was trying to balance the family books at the
time and told him that, like most home-makers, I had so
many places to spend my paychecks, my account was
zero at the end of each month.

But

He showed me a simple saving plan to provide an
income in the future, that was as practical as a trip to
the barber, and a plan which suited my budget.

Before you say—"It's a good idea, but I just can't
afford it", talk it over with a **CANADIAN GOVERNMENT**
ANNUITY representative, or write for information.

I'm glad I did!
